

A guide for parents and carers

## Toileting Equipment

Toileting equipment can be used to help a child feel more secure on the toilet. It is helpful for a child to have their feet supported when sitting on the toilet so that they can relax to open their bowels or bladder. Below are some examples of the types of equipment available at many high street and online retailers.

**Toilet Trainer Seat**

Provides basic support. Seat fits over the toilet seat.

**Toilet Steps**

Toilet steps help your child get on to the toilet and reach the sink for washing their hands.

**Family Toilet Seat**

Combines a standard adult-sized seat with a child toilet seat. This can be folded away when not in use.

**Modular Toilet Steps**

Layers of steps which can be adjusted to the height needed for the child.

**Ladder Training Steps**

Steps up to the toilet with a child sized seat and handles to help your child feel secure. The step also support their feet when sitting

**Toilet Support Handles**

Support handles can be attached to a standard toilet. They give extra support when sitting.
